Junior DevOps Engineer

InThing Corporation (formerly Tagit Solutions Inc.) is a Silicon-Valley based US company with *research & development* department in Zagreb - Croatia.

We are developing our own solutions in the field of Asset Tracking Industry! Our products are based on RFID technology, which makes it easier for clients to track and find key "Assets".

We are expanding our team in Croatia and are looking for a full-time **Junior DevOps Engineer!**

WHAT ARE WE OFFERING:

- *Flexible working hours* (office and work from home combination). If you're more for a full remote option, the conditions are: onboarding in the office and attendance once every two weeks for meeting purposes
- *On-the-house breakfast* - coffee, tea, snacks, and fruits + various sweet surprises throughout the year
- *Team lunches & Team buildings*
- Sponsored private health insurance including annual medical checks (Allianz)
- *Multisport* (100% covered)
- Online learning platform access
- Incentive rewarding of work results (bonuses and similar)

Responsibilities:

- Work with our project teams to develop easy-to-adopt automated solutions for their development pipelines and software development lifecycle
- Perform maintenance and troubleshooting of CI/CD used across multiple environments
- Design, maintain, and troubleshoot automated testing and tools
- Maintain cloud architectures including configuring and spinning up virtual machines for application deployment, cloud automation and configuration tools, understanding the need for scaling, templating, and automation

Requirements:

- Genuine interest and capability in problem solving and improvements
- Experience in cloud services
- Familiarity with Docker, K8s, Azure, Ansible, Terraform
- Familiarity with Linux and Unix based operating systems
- Have some knowledge of continuous integration and continuous delivery methodologies

As a Junior DevOps Engineer at InThing Corp you will work on efficient automation solutions and aid our customers in their technological needs.

If you are a proactive candidate with an interest in DevOps engineering and technical support, and with a strong will for continuous self-development in modern technology trends – contact us!

Please send us your CV and Cover letter to – careers@inthing.io
