

Junior QA Engineer

InThing Corporation (formerly Tagit Solutions Inc.) is a Silicon-Valley based US company with **research & development** department in Zagreb - Croatia.

We are developing our own solutions in the field of Asset Tracking Industry! Our products are based on RFID technology, which makes it easier for clients to track and find key "Assets".

We are expanding our team in Croatia and are looking for a full-time **Junior QA Engineer!**

WHAT ARE WE OFFERING:

- **Flexible working hours** (office and work from home combination). If you're more for a full remote option, the conditions are: onboarding in the office and attendance once every two weeks for meeting purposes
- **On-the-house breakfast** - coffee, tea, snacks, and fruits + various sweet surprises throughout the year
- **Team lunches & Team buildings**
- Sponsored private health insurance including annual medical checks (Allianz)
- **Multisport** (100% covered)
- Online learning platform access
- Incentive rewarding of work results (bonuses and similar)

Responsibilities:

- Assist with manual testing; execute manual test cases and scripts for products under development using test management/tracking tools
- Create and maintain test plans, cases, scenarios/scripts, in compliance with defined QA standards and methodologies
- Participate in the development, deployment, and administration of QA process, tools, and supporting technologies
- Review manual test cases for the relevant application and provide feedback on suitability for automation to the project team
- Review user stories and functional requirements
- Support, maintain and enhance all test case automation related activities during iterative development, system testing, and regression testing

Requirements:

- Experience in REST API testing
- Experience in using Postman
- Understanding of CI/CD pipelines
- Are proficient in developing, documenting and executing test cases
- Have previous Quality Assurance or Development experience
- Familiarity with working with test automation frameworks (Selenium)
- Familiarity with Azure DevOps
- Familiarity with Docker

As a QA Engineer in InThing Corp. you will work on efficient testing and assuring all features are in order while supporting our clients.

Simply said, you are a problem solver and have the ability to analyze them outside the box...if so, we should talk! 😊

Please send us your CV and Cover letter to – careers@inthing.io
