

Cybersecurity summer @ SICK MOBILISIS (Student) (m/f/d)

Location: Varaždin; on-site

29. 6. – 3. 7.

Interested in experiencing cybersecurity beyond theory and seeing how it works in a real business environment?

Join us for Cybersecurity summer at SICK Mobilisis and gain practical insight into how cybersecurity is implemented in industrial products and processes. As part of a global technology company and leader in industrial automation, SICK integrates cybersecurity into real-world solutions – and this program gives you a chance to experience it first-hand.

WHAT CAN YOU EXPECT:

- participation in a one-week program combining expert-led sessions and hands-on workshops
- introduction to core cybersecurity concepts
- insights into key regulations, standards and compliance requirements
- exposure to commonly used cybersecurity tools and practical methodologies
- participation in guided analysis of vulnerabilities and discussions with professionals

YOUR PROFILE:

- student of IT, electrical engineering or other relevant fields
- basic understanding of IT systems, embedded systems, software development
- strong interest in cybersecurity and industrial technologies
- willingness to learn and actively participate in practical exercises
- good communication skills and ability to work in a team
- excellent knowledge of English language (spoken and written)
- availability to attend the full duration of the program (all training days)

WE OFFER:

- cybersecurity professionals as your mentors
- 5 days of guided lectures and interactive workshops
- opportunity to experience how cybersecurity works in a real industry environment

- daily warm meals provided
- certificate of participation

Applications are open until May 31, 2026. The number of participants is limited.
